

ANDRA UDAYCHANDRA

Software Developer | Java Full Stack Developer

udayandra003@gmail.com | +91-9381252086

linkedin.com/in/andra-udaychandra | github.com/uday-andra

Professional Summary

Software Developer specializing in Java Full Stack Development with professional experience in backend and web application development. Skilled in Java, JavaScript, Spring Boot, Spring Security, REST APIs, JDBC, Servlets, JSP, React.js, HTML5, CSS3, MySQL, and SQL. Experienced in developing database-driven applications, secure REST APIs, authentication, API integration, and responsive web interfaces using MVC architecture. Strong foundation in Core Java, Object-Oriented Programming, Data Structures & Algorithms, and networking concepts including TCP/IP, DNS, HTTP/HTTPS, VPN, and OSI Model. Familiar with Git, GitHub, Postman, Linux, and modern development tools, with a focus on writing clean, maintainable, and reliable software.

Education

Pace Institute of Technology and Sciences, Ongole, Andhra Pradesh

2021 - 2025

Bachelor of Technology (B.Tech.) – Information Technology | CGPA: 8.35/10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Web Technologies

Technical Skills

Programming Languages: Java, JavaScript (ES6+)

Web & Backend Technologies: HTML5, CSS3, React.js, Spring Boot, Spring Security, REST APIs, Servlets, JSP, JDBC

Databases: MySQL, SQL

Operating Systems: Windows, Linux

Networking: TCP/IP, DNS, HTTP/HTTPS, VPN, OSI Model

Core: Core Java, Object-Oriented Programming, Data Structures & Algorithms, MVC Architecture

Tools and Others: Git, GitHub, Docker, Postman, IntelliJ IDEA, Eclipse, Spring Tool Suite, VS Code, Burp Suite, Termux

Professional Experience

K Quality Soft Private Limited, Hyderabad

July 2026 – Present

Software Developer

- Developing software solutions and automation workflows for CSV documentation and compliance processes.
- Contributing to the development of the CSV_Automation application for automating validation documentation workflows.
- Developing application features, document processing workflows, and automation functionality based on project requirements.
- Working with structured software development practices, debugging, testing, and maintaining application functionality.

Nimblix Technologies Pvt Ltd, Bengaluru

Feb 2026 – June 2026

Software Developer (Java Full Stack)

- Developed backend application components using Java, Spring Boot, REST APIs, JDBC, and MVC architecture.
- Developed responsive web application features using React.js, JavaScript, HTML5, and CSS3.
- Implemented MySQL database operations and integrated backend services with application data.
- Implemented authentication and authorization using Spring Security and JWT for secure application access.
- Used Postman, Git, and GitHub for API testing, source control, code management, and development workflows.

AI Variant, Bengaluru

July 2025 – Dec 2025

Java Full Stack Intern

- Developed and supported full stack application features using Java, Spring Boot, React.js, and MySQL.
- Developed and integrated REST APIs for communication between frontend and backend application components.
- Worked on database operations and application functionality using MySQL and backend services.
- Performed application debugging, API testing, and troubleshooting to identify and resolve development issues.
- Used Git and GitHub for source control, code management, and collaboration during the software development lifecycle.

Projects

CSV_Automation | [GitHub Link]

Role: Full Stack Developer

Responsibilities:

- Developed automation application to manage Computer System Validation (CSV) documentation and validation workflows.
- Implemented automated document generation and processing to simplify documentation and reduce repetitive manual work.
- Developed application features for organizing documents, workflows, and maintaining standardized documentation processes.
- Performed application testing and debugging while improving workflows to ensure reliable and consistent application functionality.

Hospital Management System | [GitHub Link]

Role: Full Stack Developer & Frontend Team Lead

Responsibilities:

- Developed a hospital management application using Java, Spring Boot, REST APIs, React.js, and MySQL.
- Implemented RESTful APIs and backend services for managing patient records, appointments, and billing operations.
- Developed database operations and application components for storing, retrieving, and managing hospital-related information.
- Led frontend development activities while testing, debugging, and integrating application features across frontend and backend components.

E-Commerce Store | [GitHub Link]

Role: Frontend Team Lead & Backend Developer

Responsibilities:

- Developed a full stack e-commerce application using React.js, Java, Spring Boot, and MySQL to manage products and orders.
- Developed RESTful APIs and implemented JWT authentication, Spring Security, and RBAC for secure application access.
- Integrated Razorpay, UPI, and Cash on Delivery (COD) payment methods to support secure and flexible order processing.
- Implemented product browsing, shopping cart, order management, and admin dashboard features for customers and administrators.

Certifications

Java Framework Training – NIMBLIX TECHNOLOGIES OPC Pvt Ltd

Full Stack Java Developer Internship – AI Variant

Cyber Security Virtual Internship – Cybersecurity Academy

Java Business Application Training Completion – Spoken Tutorial project at IIT Bombay
